

Flower Pot Bunny

Tuesday, 17 February 2009

If flower pots are out of your budget or you don't have access to them, then use a good heavy duty, white styrofoam cup! This eliminates not only the cost of the pot but the wait for the paint to dry.

What You Need:

Small flower pot
Paint (white or pink)
Paintbrushes, water containers and water
Wiggle Eyes
Orange pompoms
Pink pompoms
Construction paper
Glue
Scissors
Pipe Cleaner

What You Do:

1. Paint the flower pot pink or white. Let dry.
2. Cut two ear shapes out of construction paper. Attach with glue
3. Glue wiggle eyes and an orange pompom onto the flower pot to create the face.
4. Pipe Cleaners are used for whiskers (you may need to offer help with hot glue).
5. Two pink pompoms are glued onto the pot to create the feet.
